

Kampus Blind[®]

Strong, safe shading

a strong, economical blind designed for teaching rooms

FEATURES

ENERGY FABRICS high performance fabrics reduce energy loss and provide good shading (eg to enable students to see the Smartboards) without unduly restricting light levels, so that artificial light is often not required when the blinds are lowered.

OPERATION strong crank handles are removable to prevent unauthorised use and avoid breakages and ligature risk inherent with chain operation. Gearbox removes the effort, even with big blinds

SAFETY BRACKETS the Kampus SAFETY-LOCK ensures a blind cannot fall out of its brackets, even with misuse.

NIL MAINTENANCE sealed in bottom bar and strong components avoid need for maintenance.

TECHNICAL

DESCRIPTION contract quality roller blind, strong and maintenance free, with insulating fabrics, manual operation.

FABRICS standard fabric ranges have a degree of translucency so that artificial lighting may not be necessary when blinds are lowered, but also provide sufficient shade to permit students to see Smartboards and other visual aids. Opaque fabrics also available, where room darkening is required. All fabrics are flame retardant to British and European standards. Technical and performance details are available on request.

GUARANTEE 10 years.

PRODUCT

APPLICATION teaching areas in all types of educational institutions, to provide shading (and room darkening if required) and insulation.

OPERATION is by gearbox and crank rod with folding handle. Crank rods are removable, to prevent unauthorised use. Crank rods avoid the ligature risk and frequent breakages inherent with chain operated blinds. Crank rods will also operate at an angle, for example across benches in a science room.

SIZES approximate maximum sizes 3.5 metres wide; 3.5 metres high; area 10 square metres. Maximum sizes may vary according to weight of fabric used.

PROJECT

Kampus blinds at a Manchester FE College.

SPECIFICATION

Kampus blind available from authorised distributors (for details please visit www.aluzion.co.uk)

FABRIC [] glare control/insulating fabric from Aluzion standard ranges
[] opaques for room darkening

To be installed and commissioned in accordance with Aluzion instructions and recommended procedures.

The Kampus Blind is manufactured by Aluzion and is available from appointed distributors.
