

A strong and effective contract roller blind

FEATURES

Economical: a basic, contract quality roller blind for use in all sorts of applications. Very good value for money and easy to install.

Fabric choice: the range includes basic contract fabrics giving excellent value, high performance energy saving fabrics and 100% opaque fabrics for room darkening.

Strength: 40 mm diameter roller tube for strength and larger maximum blind sizes.

Availability: from local dealers who are trained in Aluzion products and can provide a full sub contract service (see website for dealers www.aluzion.co.uk).

TECHNICAL

Description: roller blind system designed for economy and strength available with a variety of fabrics for different situations.

Fabrics: are available for glare control or room darkening. Glare control fabrics can have varying degrees of openness, to allow a view outside and may also be translucent, so that the need for artificial lighting is reduced. Room darkening fabrics are opaque. Fabrics are available with good porosity to allow air exchange. All fabrics are flame retardant to British and Continental standards.

All fabrics have insulating properties which help significantly in achieving energy savings. Technical data is available.

Guarantee: 5 years.

PRODUCT

Application: the Akademy Blind is ideal where effective glare control or room darkening is required at competitive prices.

Operation: manual operation by strong bead chain. (Where operation is required by gearbox and crank rod, or electric, please consider our College Blind or Kampus Blind).

Sizes approximate maximum: width 2.9 metres; height 3.0 metres; area 7.5 square metres. Maximum sizes may vary according to the weight of fabric used.

Graphics: standard fabrics are excellent for printing logos, text or images in one or more colours.

Hardware: a range of bracket and bottom bar options are available including different metalwork finishes.

PROJECT

Akademy blinds at The Perse School, Cambridge.
